Allowable Subject Matter

4. Claims 1-3 and 5-9 are allowed.
5. The following is an examiner's statement of reasons for allowance:
Independent claim 1 is allowed because the closest prior art, Chu et al (US 5890055), Rypinski et al (US 5,461,627) and Knop et al (US 6,480,163), either singularly or in combination, fail to anticipate or render obvious that a common modulated radio frequency carrier signal is used in both the distribution network and over a said wireless connection to communicate said data between a said subscriber equipment and the base station where said wireless connection connects one or more proximate subscriber equipment to the distribution network, as argued by Applicants in the Appeal Brief filed 10/01/04.

Claims 2-3 and 5-9 depend on claim 1. Therefore, they are allowed
